**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 4-14, 19-21 and 23-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Wolfe et al. (USPN 4541055).

Wolfe teaches a processing method and device comprising a component processing device, a laser, a reference position or point and a connecting element (36) connectable to the component (figures 3I-3K, col 2 lines 20-60). The reference point can be changed or adjusted relative to other parts of the apparatus (col 16 lines 54-68 and col 18 lines 38-60). The beam is directable at an angle (col 19 lines 10-33) and variably focused and projected (col 28 line 60 – col 29 line 5).

Art Unit: 1725

3. Claims 1-3, 6-9, 19-22, 28 and 29 are rejected under 35 U.S.C. 102(e) as being anticipated by Banks et al. (USPN 6134940).

Banks teaches a processing method and device comprising a component processing device, a laser, a reference position or point and a connecting element (rivet) connected to the component (col 3 lines 5-40). The reference point can be a mark which matches the shape of the connector (col 5 lines 49-51) and can be changed or adjusted relative to other parts of the apparatus (col 7 lines 6-17).

#### ***Allowable Subject Matter***

4. Claims 15-18 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kim et al. (USPN 6555780 B1, later date), Ito et al. (USPN 4567347, variable projection) and Rantsch (USPN 3130633, variable projection).
